React Hooks in practice
I know why you don't use Typescript
How to use async functions in JS

Matthew Palma

Senior Full Stack Engineer | Vue, React, Node.js, Typescript,
Serverless
United States

Summary

As a Senior Full Stack Engineer, I have 9 years of experience in developing and delivering web applications using various technologies, such as Vue, React, Node, and Typescript. I work as an IT consultant, focused on creating scalable and performant solutions for different clients and domains.

Previously, I was a Senior Frontend Engineer at Storyblok, a headless CMS platform that empowers developers and marketers to create dynamic websites. There, I worked on improving the Editor Experience, the site editor that allows users to manage and preview their content. I created components for the Design System using Vue and Storybook, added features and refactored the codebase, and introduced Typescript to enhance the code quality and maintainability. I also created two plugins, Content Locking and Auto-Save, that improved the user experience and productivity. Additionally, I worked with the Dev Relations team to support the customers and present the latest technologies, such as Vue 3 and Svelte, to the company community.

I am currently pursuing an Engineer's degree in Computer Engineering at Universidade Anhembi Morumbi, where I am learning the fundamentals and applications of computer science and engineering. I also have a System Analysis diploma from Faculdade de Tecnologia de Sorocaba and a Web Design certification from ETEC Fernando Prestes. I am passionate about learning new technologies and solving complex problems with innovative and creative solutions. I value collaboration, quality, and customer satisfaction, and I aim to grow as a professional and as a person.

Experience

Jüssi
Senior Software Engineer

September 2023 - Present (3 months)

United States

PETE.Tech

Senior Software Engineer

July 2023 - September 2023 (3 months)

Germany

Storyblok

Senior Frontend Engineer

November 2021 - June 2023 (1 year 8 months)

Austria

- * Worked focused on the Editor Experience (the site editor)
- * Created components for the Design System using Vue and Storybook
- * Added many features for the Site Editor
- * Created a service of mocks to mock the API responses (using docker, node and restify)
- * Refactoring
- * Added Typescript
- * Worked with the Dev Relations team doing improvements and helping the customers on their implementations
- * Technology presentation for the company community (Typescript, Vue 3 and Svelte)
- * Plugins created (Content Locking and Auto-Save)
- * Bug corrections in Vue 1 (Older app version)

- Vue.js (1,2 & 3)

- Node.js

- Typescript

Grupo PRIMO

Senior Frontend Engineer

February 2023 - April 2023 (3 months)

São Paulo

Empiricus

2 years 8 months

Senior Frontend Engineer

November 2020 - November 2021 (1 year 1 month)

São Paulo, São Paulo, Brazil

Planning and development of frontend software, performance monitoring and implementation of funnel tracking tools, working exclusively with the E-commerce squad.
